Projects

You Lucky Dog!   Deployed||GitHub

- Developed a dynamic application where users could search for pets to adopt using a zip code. Users also have the ability to select the size, gender and age. This site was created using HTML, CSS, and JavaScript.

Thrve   Deployed||GitHub

-        Created with the idea of helping those who struggle with mental illness and other depression issues. This application was programmed by using MySQL, Handlebars.js REST API that was designed specifically for this task and EXPRESS.js The aim here was to put the I back into Thrive!

Weather Dashboard   Deployed||GitHub

-        Developed this application using Moment.js, jQuery, and a third-party API to generate the current and a five-day forecast given the city that the user inputs. This application stores the search history for easier accessibility.
